# BECOME A COURSE ADMIN

Own one course. Publish once. Earn every month.

joelitemed-frontend-production.up.railway.app

## WHO IS A COURSE ADMIN?

A Course Admin is the smallest, most focused — and most powerful — role on JoeliteMed.

You don't run a whole school. You don't coordinate a whole year group. You own ONE course.

### COURSE ADMIN IN A NUTSHELL

"I passed 2nd MBBS Physiology last year.
I have the past questions, the notes, and the insights.
I put them on JoeliteMed.
Every student who subscribes to 2nd MBBS pays me.
Every month. For as long as they stay subscribed."

That's the entire model. One course. One upload. Recurring income.

You are the reason the platform works. Without your material, no one subscribes. With your material, everyone wins — you most of all.

## WHAT YOU ACTUALLY DO

You do one thing: publish content for your course.

### STEP 1 — GATHER

Collect the past questions you already have. Your WhatsApp group's folder. Your old photocopies. The PDFs passed down through your class. Anything from your course's exams.

Answer them accurately.

From 2020 is ideal.

### STEP 2 — UPLOAD

Upload through the JoeliteMed content builder. Choose the format that fits:

- MCQ banks — questions + options + correct answer + explanation
- Theory — essay questions with structured sub-answers
- VIVA stations — oral exam questions with model answers
- OSCE stations — picture-based questions with marking guidance (if your course uses them)
- Short / Long Cases — clinical case walkthroughs (for clinical-year courses only)

For example in 2nd MBBS Anatomy, the contents to upload range from theory (1st incourse through 2nd MBBS exam) covering theory, MCQ, practicals (stipple chase).

### STEP 3 — PUBLISH

Hit publish. Your course goes live.

That's the last time you have to do anything if you don't want to. The content sits on the platform, students subscribe, and money lands in your balance — forever, for as long as they stay subscribed.

## WHAT YOU EARN

Here's the exact maths, in plain English:

Every subscription to your level is split:

30% → Platform (JoeliteMed keeps this — it covers hosting, payments, security, and running everything)

20% → YOU (the Course Admin for that course)

Rest → Institution Admin and other course admins at the level

You get 20% of every subscription on your level.

### CONCRETE EXAMPLES

If 50 students subscribe to your level at ₦4,000/month:

₦4,000 × 20% = ₦800 per subscriber

₦800 × 50 subscribers = ₦40,000/month

If 100 students subscribe: ₦800 × 100 subscribers = ₦80,000/month

If 200 students subscribe: ₦800 × 200 subscribers = ₦160,000/month

Those amounts land in your balance every month. Automatically. For as long as students keep renewing.

## WHAT YOU DON'T HAVE TO DO

The platform handles the rest:

✓ Hosting and infrastructure

✓ Payment processing (card, bank transfer, USSD)

✓ Subscription management and renewal

✓ Student support and content delivery

✓ Withdrawal processing to your bank account

✓ Every naira accounted for in an auditable ledger

✓ Content promotion to bring you subscribers

## WHICH COURSE ADMIN SHOULD YOU BE?

### FOR 100 LEVEL STUDENTS

Biology · Chemistry · Physics · Mathematics · English

These are the foundational subjects every medical school runs through 100L. The past questions are easy to source. The pool of students who need them is the biggest cohort on campus (often 3–5× the size of any MBBS year).

If you're finishing 100L now, this is the fastest way to start earning on JoeliteMed.

### FOR 2ND–3RD MBBS STUDENTS

Anatomy · Biochemistry · Physiology · Pathology · Pharmacology

These are the preclinical pillars. Every medical student must pass them. The content is denser but the audience is stable.

If you just passed one of these, you have the exact set of past questions the next cohort is dying to find.

### FOR 4TH–5TH MBBS STUDENTS

Internal Medicine · Surgery · Community Medicine · Paediatrics · Obstetrics & Gynaecology

These are the clinical-year subjects. Content includes not just MCQs but also VIVA stations, OSCE stations, Short Cases, and Long Cases — which is exactly where most students struggle.

If you just finished final year, your knowledge is the most valuable on the platform. Other students will pay to have it.

## THE WITHDRAWAL SYSTEM — YOU KEEP WHAT YOU EARN

### REQUIREMENTS

- Minimum ₦10,000 to request a withdrawal
- One request per 30 days
- Paid directly to your Nigerian bank account (NUBAN)

### PROCESS

1. Request withdrawal from your Revenue page
2. Enter bank name, account number, account name
3. Superadmin reviews and approves
4. Money hits your account
5. Full transaction history shown on your dashboard

Full transparency. No hidden fees. No surprise deductions. Every naira accounted for in the ledger.

## PROOF IT WORKS — THE MADONNA PILOT

JoeliteMed isn't a thought experiment. It was tested at Madonna University on the 5th MBBS cohort this year.

### REAL STUDENTS. REAL CONTENT. REAL MONEY.

- Deployed to the full final-year cohort
- Students used it as their primary revision tool
- Revenue exceeded every projection
- Zero ad spend — all growth from word of mouth
- Course Admins who built the content earned real, recurring income from their own work

Now it's expanding to other medical schools across Nigeria.

If you're at a school that's not on JoeliteMed yet, you could be one of the first Course Admins from your institution — which means you capture the entire subscriber base from your school before anyone else.

## WHY COURSE ADMIN IS THE BEST ROLE ON THE PLATFORM

1. Lowest barrier to entry. You don't need a team. You don't need approval from above. You just need one course's worth of past questions.
2. Highest effort-to-reward ratio. Upload once. Earn for as long as students stay subscribed.
3. Direct line to income. You're not depending on other admins to do their job. Your earnings come from your own content. Your work, your money.
4. You get paid even if you don't do anything else. Once published, your content keeps working. Even if you stop uploading tomorrow, subscribers keep coming.
5. You own a piece of your school's revenue forever as long as you are upto date. No matter what other admins do, your course keeps its 20% share of every subscription. That share doesn't shrink.
6. You learn the material at a deeper level. Writing correct, well-structured answers for others is the fastest way to master your own course. Every Course Admin ends up better at their subject than they were before.
7. You help your course mates — and you get paid for it. This is a role that creates real impact in your school while putting real money in your pocket.

## HOW TO GET STARTED

### STEP 1 — APPLY

Go to:
joelitemed-frontend-production.up.railway.app/earn
Click "Apply now". Fill in:

- Institution (your school)
- Role: Course Admin
- Level (100L / 1st MBBS / etc.)
- Course (e.g. Physiology)
- Email address
- Proof of affiliation (student ID or departmental letter)
- Sample past questions from your course

Submit.

### STEP 2 — GET VERIFIED

JoeliteMed reviews your application stage by stage.

- Identity verified
- Affiliation with your school verified
- Seat availability confirmed

Most applications clear within days.

### STEP 3 — PUBLISH

Once approved, upload your content through the builder.

Every set is reviewed by the tier above you (Level Admin) before going live — which is a good thing. It means the quality bar stays high, and everyone on the platform benefits.

### STEP 4 — EARN

The moment your content goes live, every new subscriber in your scope adds to your income. Track it in real time from your Revenue page. Withdraw any time your balance crosses ₦10,000.
